

As a person that travels frequently, the convenience of having satellite radio available to me is very important. The variety of formats and information available is simply not available elsewhere. This service is well worth the monthly subscription fee. It should not be up to the National Association of Broadcasters to dictate what I'm permitted to hear from a service that I subscribe to and pay for. Clearly the NAB is trying to eliminate new competition.

I respectfully request that the FCC reject the NAB's petition 04-160 and instead support a free market that allows satellite radio to provide the programming that I want.
